

Bag in Box System - BCIBC â?? IBC 500

Description

Due to its thought-out construction, the Intermediate Bulk Container (IBC) is a reusable transport system for liquids which saves money within the goods cycle. Advantages in comparison to traditional one-way transport tanks:

- â? Costs per transport are reduced considerably
- â? Reusable container (only liner bag is disposable)
- â? Hygiene â?? no decaying, no corrosion, easy cleaning
- â? Safety â?? product is protected; in combination with the RFID transponder the IBC can be traced
- â? Easy filling, emptying and transport
- â? Optimal space utilization â?? stackable and collapsible

The new BCIBC has a considerable cost advantage in comparison to conventional systems due to the collapsible construction and the changeable liner bags.

The new BCIBC offers maximum safety and hygiene through changeable liner bags â?? on request also available in antiseptic form.

Product code / Ref: BCIBC â?? IBC 500

External Size: (L) 1200 mm (W) 800 mm (H) 910Â mm

Internal Size: (L) 1110 mm (W) 710 mm (H) 690Â mm

Consists of:

1 Clip-on lid

650 kg

Weight: 67Â kg

Material: 1 A new material

Colour/: Grey

Volume: 500Â Litres
Height collapsed: 430 mm
Useful height: 690 mm

Loading capacity:

Statistic stackable: 1 5

Dynamic stackable: 2

Seal BCPB

Capacity: ca. 20 N

Material: PP

Colour: Black
